Automation ROI Business Case

Generated: November 27, 2025

Client Inputs

Industry	Architecture & Building Services
Billable Technical Staff Count	50
Average Billable Rate (AUD)	$185
Core Tech Stack	M365/SharePoint

Financial Analysis

Metric	Value
Annual Efficiency Loss (Burn Rate)	$2,220,000
Tier 1 Opportunity (Immediate Savings)	$888,000
Capacity Hours Unlocked	12,000 hours
Potential Revenue Opportunity	$2,220,000

Recommended Next Steps

Tier 1 Implementation: Focus on automated data extraction to achieve immediate savings of $888,000 annually.

Tier 2 Implementation: Expand automation to unlock 12,000 billable hours, representing $2,220,000 in revenue capacity.

Next Action: Book a Discovery Call to validate these numbers and discuss implementation roadmap.

About Curam AI

Curam AI specializes in automating manual workflows for technical consulting firms. Our solutions reduce administrative overhead and unlock billable capacity by eliminating time-consuming data entry and document processing tasks.
